

PolyWa OVAL LEDMO

Plug & Play LED Modules for Street Lighting

Kwality's UNIQUE Lens-less Solution for Street Lighting with onboard Driver IC.
Kwality brings to you the latest innovation for Solid State STREET LIGHTING- in the form of PolyWa OVAL LEDs.The
PolyWa OVAL LEDs save over 15% losses of Light that occurs at the LED Lens interface in conventional Lambertian LEDs.

LEDMO consists of an array of 32LEDs or 24LEDs or 18LEDs or similar connected in 3-4 Strings.
controlling IC **Each string of LEDs has a current with negligible voltage drop (for preventing loss of power & loss of efficiency) in series and an on board regulator. Each string takes equal current from external power supply, thus all LEDs operate at same current irrespective of individual Vf differences.**
Typical Size of LEDMO is - 165*110mm
